

M.L PARMAR COLLEGE OF COMPUTER SCIENCE & IT

ESTD : 2009

ESTD : 2009

PRE-LECTURE ASSIGNMENT

Course: Web Framework and Services (504)

Semester V – BCA

Objective

Before attending the lectures, students should become familiar with:

- Client-Server Architecture
 - Web Technologies
 - Programming Logic
 - Database Basics
 - HTTP Communication
 - Modern Web Development Concepts
-

PART A – SELF LEARNING (10 Marks)

Students must study the following topics and write short notes (50-100 words each).

Topic 1: Internet vs World Wide Web

1. What is the Internet?
2. What is the World Wide Web?
3. Difference between Internet and WWW ↗.

Topic 2: Client-Server Architecture

1. What is a Client?
2. What is a Server?
3. Give examples of client-server applications.

Topic 3: Web Development Technologies

1. HTML
2. CSS
3. JavaScript

4. PHP
5. MySQL

Topic 4: HTTP Basics

1. What is HTTP?
2. What is HTTPS?
3. Meaning of:
 - URL
 - Domain Name
 - Web Hosting

Topic 5: Open Source Technologies

1. What is Open Source Software?
 2. What is XAMPP?
 3. What is VS Code?
-

PART B – RESEARCH TASK (10 Marks)

Answer the following questions:

1. Why is PHP still widely used for web development?
 2. Name five websites developed using PHP.
 3. What is a framework?
 4. Difference between a programming language and a framework.
 5. What are CodeIgniter and Laravel?
-

PART C – HANDS-ON ACTIVITY (10 Marks)

Activity 1: Install Software

Install:

- Visual Studio Code
- XAMPP

Take screenshots of:

- VS Code opening successfully
- XAMPP Control Panel
- Apache Running
- MySQL Running

Paste screenshots in a PDF report.

Activity 2: Create Your First Web Page

Create a file named:

 HTML

`</>`  

index.html

Containing:

 HTML

`</>`  

```
<!DOCTYPE html>
<html>
<head>
  <title>My First Web Page</title>
</head>
<body>
  <h1>Welcome to Web Development</h1>
  <p>I am ready to learn PHP and Laravel.</p>
</body>
</html>
```

Take a screenshot and include it in the report.

PART D – DATABASE AWARENESS (10 Marks)

Study the following terms and write one-line definitions:

1. Database
2. Table
3. Record
4. Field
5. Primary Key
6. Foreign Key
7. SQL
8. CRUD Operations
9. Query
10. DBMS

PART E – THINKING QUESTIONS (10 Marks)

Write answers in 100–150 words.

Q1

Why do modern websites need databases?

Q2

How does a browser communicate with a web server?

Q3

What advantages do frameworks provide compared to writing code from scratch?

Q4

Why is security important in web applications?

Q5

What is the role of APIs in modern web applications?

PRE-LECTURE READINESS QUIZ (20 Marks)

Choose the correct answer.

1.

HTML stands for:

- a) Hyper Text Markup Language
- b) High Transfer Machine Language
- c) Hyper Tool Markup Language
- d) Hyperlink Text Machine Language

2.

Which language is executed in the browser?

- a) PHP
- b) MySQL
- c) JavaScript
- d) Laravel

3.

Which software package contains Apache and MySQL?

- a) Composer
- b) XAMPP

- c) Laravel
- d) Git

4.

Which database is commonly used with PHP?

- a) Oracle
- b) MongoDB
- c) MySQL
- d) PostgreSQL

5.

CRUD stands for:

- a) Create Read Update Delete
- b) Copy Read Upload Download
- c) Create Run Upload Delete
- d) Create Replace Undo Download

6.

HTTP is a:

- a) Database
- b) Programming Language
- c) Protocol
- d) Framework

7.

Which framework follows MVC architecture?

- a) HTML
- b) CSS
- c) Laravel
- d) MySQL

8.

API stands for:

- a) Application Programming Interface
- b) Advanced Program Integration
- c) Automated Program Interface
- d) Application Process Integration

9. Which software is used for PHP dependency management?

- a) Git
- b) Composer
- c) Apache
- d) MySQL

10. Laravel is primarily a:

- a) Database
- b) Framework
- c) Browser
- d) Server
